BOOTSTRAP

EDUCATION

UNIVERSITY OF TEXAS
December 2020 - March 2021
Attended the Full Stack Web Developer Bootcamp which taught me the skills needed to become a Full Stack Web Developer and received a Certificate of Completion

LA PORTE HIGH SCHOOL
August 2005- June 2009
Graduated from High School and received High School diploma

PROFESSIONAL PROFILE

Passionate about creating through code and working alongside a team where collaboration, mentorship, and growth are encouraged. Attended The University of Texas' Full Stack Web Development Bootcamp which taught me skills in HTML, CSS, and JavaScript. I've always been a team player, enjoyed teaching others, and was even on a leadership team which taught me how to push for growth and to be humble. I'm excited to use my skills and join a team who is as passionate about coding as I am.

PROJECTS

Rescue Spot was created to help the user search for dogs that are available for adoption in their desired area with their zip code. Not only does it allow the user to find dogs, but it also allows the user to see local dog parks to enjoy with their newly adopted pet.

Day Planner was created to help our user to schedule and add their events for their work day. The events are saved on local storage which allows the user to retain the items even if the page has been refreshed.

Coding Challenge is a timed quiz that asks the user a couple of coding questions. The user clicks the start button to begin the quiz and has until the end of the timer to complete the questions.

EXPERIENCE

ADMISSIONS REPRESENTATIVE
Vandelay Education | January 2020 - December 2020
My responsibilities include:
Assisted Students through the enrollment process for our medical, dental, and web development schools across the country by answering questions about our programs, setting up payment plans, and obtaining all required documentation.

CLAIMS PROCESSING MANAGER
MSB Consulting | August 2017 - December 2019
My responsibilities include:
Responsible for the Claims Processing Department which included hiring Claims Processors, keeping us on goal for completing the paper logs, and meeting with other departments to make improvements to our processing tools and processes.
